COLLECTED FOREST TREE SEEDLINGS, SHRUBS AND VINES

WOODS GROWN PLANTS

The stock offered below is not finished plants, but is woods grown, collected stock from the mountains and forests, suitable for transplanting. Woods grown or collected stock is not to be classed with nursery grown or cultivated plants. We seldom recommend Collected Stock, however many of our customers advise us that with Collected Stock they have obtained satisfactory results. The prices are certainly attractive.

Many of the varieties we offer in Collected Stock are items that frequently become short in Nursery Grown, hence the Collected list, but do not expect the Collected

Stock to have as good root system, be as well developed or live as well as Nursery Grown.

Note.—Most collected seedlings, such as Maples and some others, except large sizes, are crooked near the ground and should be cut back to crown before planting. They grow up straight, smooth and much faster and quicker than when planted without cutting back. We cut back all seedlings to crown before transplanting.

HARDY FERNS

COLLECTED

We wish here to call your attention to the five varieties of hardy ferns which we have dug up in the mountains; they have not been cultivated in the nursery rows, but are dug from the woods. We have been selecting quite a few of them, and so far as we know they have been giving satisfaction. The Cinnamon, Royal and Christmas ferns are clumps, and the other two varieties are small roots. We offer them as follows:

EVERGREENS

COLLECTED—NATIVE—WOODS GROWN

The small evergreens are gathered on the mountains, and only on damp days when the weather is suitable. The small bare-root evergreens are puddled as gathered, packed light and shipped by express unless otherwise instructed. Orders will be booked subject to our ability to have them gathered. Do not expect them to all live and grow, some of them will die under the most favorable conditions.
